Summary of Qualifications: Full-stack software developer with 5+ years of experience building enterprise-grade applications in finance and technology. Skilled in .NET Core, C#, Java, Angular, React, and SQL, with a proven record of delivering secure, high-performance web solutions. Adept at collaborating with cross-functional teams to automate workflows, reduce manual effort by up to 40%, and improve customer experience. WES-validated B.S. in Computing. Currently seeking full-stack or backend roles in the U.S. to leverage technical expertise and passion for clean, scalable architecture.

TECHNICAL SKILLS

- **Programming Languages:** Java, C#, JavaScript (React), PHP, Python
- **Web Technologies:** Spring MVC, ASP.NET Core, React.js, Angular
- **Database Management:** MySQL, PostgreSQL, MongoDB, Oracle, MSSQL.
- **Testing:** Unit testing (JUnit, NUnit), Mockito, Manual Testing
- **CI/CD:** GitHub, GitLab, TeamCity.

EXPERIENCE

Software Developer

Dynamics Inc, Cheswick, PA

October 2025 – Present.

- **Developed internal automation tools** including .NET worker programs and a WinForms application to streamline processing of collectible metadata.
- **Collaborated with business and technical stakeholders** to analyze operational workflows, producing a proposed solution and requirements document for a new fulfillment system to improve scalability and process efficiency.
- **Appointed Technical Lead** for collectible initiatives, overseeing end-to-end production workflows and coordinating cross-functional teams while communicating timelines, blockers, and launch readiness to clients.

Programmer Analyst

Quality Network Cooperative Ltd, Kingston, Jamaica

Apr 2022 – Jan 2025.

- **Designed and implemented a web-based financial reporting system** using Java Spring MVC, generating balance sheets and income statements in PDF/Excel formats, reducing manual report generation time by 40%.
- **Collaborated with cross-functional teams** to gather technical requirements and translate them into scalable software solutions, enhancing functionality across internal platforms.
- **Led API integrations with third-party tools**, ensuring seamless communication between components and improving system interoperability.

Software Developer

Blue Chip Strategies Ltd, Kingston, Jamaica

May 2020 - Apr 2022.

- **Developed and maintained ASP.NET Core back-end services** for National Commercial Bank (NCB), ensuring high availability and optimal performance.
- **Enhanced user experience for GoIPO**, driving a 30% increase in registrations and boosting customer trust by 25% through key UI/UX improvements using Razor Pages.

EDUCATION

Bachelor of Science (B.S.) in Computing (Evaluated by WES)

Major in Information Technology, Minor in Enterprise Computing

University of Technology Jamaica, Old Hope Road, Kingston, Jamaica

Nov 2020.
